EXPERIENCE

Full Stack web developer   *Independant contractor / freelancer*
Full-time (Remote Work)   *May 2018 - Present*

I have been working for more than 15 clients at Upwork and other platforms from different parts of the world. With different scopes and requirements that range from technical support to developing and updating new themes and plugins for the WordPress platform and developing different types of single page applications on React

Frontend Developer   *Orinoco.io*
Full time (El Tigre, Anzoategui, Venezuela)   *May 2018 – Oct 2018*

- Designed a decentralized crypto exchange, along a small team of 3 and the 2 founders
- Developed a Single Page Application with Vue, Vuetify, and GraphQL
- After 3 months of finishing the Project, The user base doubled to 4000, and has made more than 75000 transactions.

Web Developer   *PDVSA Petroleos de Venezuela S.A.*
Internship (El Tigre, Anzoategui, Venezuela)   *Feb 2018 – May 2018*

- Made an extensive analysis of the user stories told by 10 members of Company's Administration management.
- Developed a web application on Codeigniter with Postgres as a database, according to the company's standards and methodologies, as explained by the software development team.
- Successfully integrated at the company's regional area of operations (Orinoco Oil Belt)
